

**Virginia Pollutant Discharge Elimination System (VPDES)
 General Permit for Stormwater Discharges
 Associated with Industrial Activity (VAR05)
 CHESAPEAKE BAY TMDL ACTION PLAN-ANNUAL
 REPORTING WAIVER REQUEST**

Facility Name:			
Date Waiver Submitted:			
Facility General Permit Number:	VAR05		
Facility Mailing Address:	(street)		
	(city)	(state)	(zip)
			(phone)
Facility Action Plan Contact:	(name)		(title)
	(phone)		(email)

This request is for a waiver of the Chesapeake Bay TMDL Action Plan Annual Reporting requirement in VAR05 (see, 9VAC25-151-70 Part I B.8. g. and h.). To qualify for this waiver a facility must establish that it has achieved all of the pollutant reductions identified in its required Chesapeake Bay TMDL Action Plan. This waiver DOES NOT alter applicable benchmark monitoring, effluent limitation, or other impaired water monitoring requirements under VAR05 for TSS, nitrogen or phosphorus.

Pollutant reduction achieved using a combination of the following alternatives (check the appropriate alternatives used):

- Reductions provided by one or more of the BMPs from the Virginia Stormwater BMP Clearinghouse listed in 9VAC25-870-65, approved BMPs found on the Virginia Stormwater Clearinghouse website, or BMPs approved by the Chesapeake Bay Program. Any BMPs implemented to provide the required pollutant reductions shall be incorporated in the SWPPP and be permanently maintained by the permittee.

List the outfall(s) and corresponding installed BMPs for each outfall:

Outfall	Installed BMP

Outfall	Installed BMP

- Implementation of site-specific BMPs followed by a minimum of four stormwater samples collected in accordance with sampling requirements in Part I B 8 a that demonstrate pollutant loadings have been reduced below those calculated under Part I B 8 c. Any BMPs implemented to provide the required pollutant reductions shall be incorporated in the SWPPP and be permanently maintained by the permittee.**

List the outfall(s) and corresponding site-specific BMPs for each outfall:

Outfall	Installed BMP

Attach a copy of the DEQ Chesapeake Bay Calculation Spreadsheet using the four stormwater samples for each outfall collected after implementation of the site specific BMPs demonstrating the required reductions below those calculated under Part I B 8 c (2). Also attach the laboratory reports for the four additional samples.

- Acquisition of nonpoint source credits certified by the board as perpetual in accordance with § 62.1-44.19:20 of the Code of Virginia.**

Submit documentation demonstrating the acquisition of sufficient nonpoint source credits to address the target reduction(s) for the site.
